Integrative Document & Content Management

Portals present unique strategic challenges in the academic environment. Their conceptualization and design requires the input of campus constituents who seldom interact and whose interests are often opposite. The implementation of a portal requires a coordination of applications and databases controlled by different campus units at a level that may never before have been attempted at the institution. Building a portal is as much about constructing intra-campus bridges as it is about user interfaces and content. *Designing Portals: Opportunities and Challenges* discusses the current status of portals in higher education by providing insight into the role portals play in an institution's business and educational strategy, by taking the reader through the processes of conceptualization, design, and implementation of the portals (in different stages of development) at major universities and by offering insight from three producers of portal software systems in use at institutions of higher learning and elsewhere.

The Integrative Research Review

Every book, paper, or dissertation in the social sciences involves some element of literature review. This is the first book to systematize the practice of reviewing existing literature, and will thus be invaluable to everyone who writes in the social sciences. Those students who have some background in basic research methods and statistics will find that this book shows them how to produce a review that can be replicated, will achieve consensus, and focus debate in a constructive fashion.

The Psychology of Trust

Trust has always been complicated. This book works to examine aspects and theories of trust. Chapters look at trust in the workplace. It considers types of leadership and how that influences the trust of employees. As workplaces and societies become more diverse, there can be an impact on trust. Many times, individuals will have implicit biases that can influence their perception of others and their ability to trust. Trust has also become more complicated with the advent of the internet. We can now connect with more ideas and individuals. Yet, is the person who communicates back with us real? Is it someone with a fake account or maybe not even a person at all, but a robot? Even though trust is complicated and we can sometimes be taken advantage of, we still need to find ways to trust others in our lives. Trust allows us to develop a community. We have always needed the community to be safe, both physically and emotionally. This book allows you to connect with new ideas and aspects of trust.

Recent Developments in Technology-Enhanced and Computer-Assisted Language Learning

The pace at which technology changes has created unique challenges in the integration of such technologies into language teaching and learning. Innovative pedagogies and strategies must be developed that adapt to these changes and accommodate future technological changes. *Recent Developments in Technology-Enhanced and Computer-Assisted Language Learning* is an essential research publication that focuses on technological influences on language education and applications of technology in language learning courses including foreign and second language learning. Featuring an array of topics such as artificial intelligence,

teacher preparation, and distance learning, this book is ideal for teachers, language instructors, IT specialists, instructional designers, curriculum developers, researchers, education professionals, academicians, administrators, practitioners, and students.

Information Technology as a Facilitator of Social Processes in Project Management and Collaborative Work

Project management (PM), as a discipline, has been undergoing an incremental inclusion of theories, techniques, and processes from fields related to organizational behavior. Parallel to this has been the dominance of Information Technology (IT) projects within the field of Project Management. *Information Technology as a Facilitator of Social Processes in Project Management and Collaborative Work* provides emerging research that bridges the gap between IT and project management. While highlighting the importance of Information Technology and the social process of work, the readers will learn how project management applies techniques to achieve objectives through IT projects. This book is an important resource for project managers, executives, IT managers, consultants, students, and educators.

The Information Management Journal

Would you use complementary and alternative medicines (CAMs)? Well, research has shown that up to three quarters of patients with cancer may at least supplement their treatment with such therapies, spending as much on CAMs as conventional drugs. How do you decide? This book provides a full range of perspectives on CAMs from patients and CAM practitioners to conventional doctors who oppose the use of these alternative treatments because of the lack of evidence of efficacy and safety. Then there are the CAM researchers, educators and regulators who view CAMs from different perspectives. The broad array of opinions build a complete picture of the issues for discerning readers to be adequately informed to make up their minds and draw their own conclusions.

Perspectives on Complementary and Alternative Medicines

This book contains the refereed proceedings of the 13th International Symposium on Mathematical Morphology, ISMM 2017, held in Fontainebleau, France, in May 2017. The 36 revised full papers presented together with 4 short papers were carefully reviewed and selected from 53 submissions. The papers are organized in topical sections on algebraic theory, max-plus and max-min mathematics; discrete geometry and discrete topology; watershed and graph-based segmentation; trees and hierarchies; topological and graph-based clustering, classification and filtering; connected operators and attribute filters; PDE-based morphology; scale-space representations and nonlinear decompositions; computational morphology; object detection; and biomedical, material science and physical applications.

Mathematical Morphology and Its Applications to Signal and Image Processing

This sourcebook contains descriptions of original leadership course syllabi and programs for use by educators, student activity directors, and others designing and delivering leadership-development courses and programs. To be selected for this sourcebook, programs must focus on leadership; contain details about curriculum objectives, format, outline, learning modules, projects, activities, and evaluation; include innovative or unique content, method of delivery, or audience; and have been included in a previous edition. The descriptions are divided into five primary sections: degree programs (graduate and undergraduate), academic sources (from high school to graduate level), cocurricular programs, professional programs, and community programs. Also included are a bibliography of reading material used in the courses and programs, two essays describing the design of new campus programs, and an index for references to institutions, course topics, teaching methods, and leadership skills and styles. (JMD).

Leadership Education

This book presents a model for understanding distress and change in counselling and psychotherapy by demonstrating the key similarities between different therapeutic approaches.

Integrating Counselling & Psychotherapy

This seven-volume set LNCS 14054-14060 constitutes the proceedings of the 25th International Conference, HCI International 2023, in Copenhagen, Denmark, in July 2023. For the HCCII 2023 proceedings, a total of 1578 papers and 396 posters was carefully reviewed and selected from 7472 submissions. Additionally, 267 papers and 133 posters are included in the volumes of the proceedings published after the conference, as "Late Breaking Work". These papers were organized in the following topical sections: HCI Design and User Experience; Cognitive Engineering and Augmented Cognition; Cultural Issues in Design; Technologies for the Aging Population; Accessibility and Design for All; Designing for Health and Wellbeing; Information Design, Visualization, Decision-making and Collaboration; Social Media, Creative Industries and Cultural Digital Experiences; Digital Human Modeling, Ergonomics and Safety; HCI in Automated Vehicles and Intelligent Transportation; Sustainable Green Smart Cities and Smart Industry; eXtended Reality Interactions; Gaming and Gamification Experiences; Interacting with Artificial Intelligence; Security, Privacy, Trust and Ethics; Learning Technologies and Learning Experiences; eCommerce, Digital Marketing and eFinance.

HCI International 2023 – Late Breaking Papers

"This book discusses the latest findings in knowledge-intensive, collaborative environments, focusing on frameworks and solutions for improving collaboration online"--Provided by publisher.

Advancing Collaborative Knowledge Environments: New Trends in E-Collaboration

This book constitutes the proceedings of the 4th International Conference, IN4PL 2023, held in Rome, Italy, during November 15-17, 2023. The 11 full papers and the 13 short papers included in this volume were carefully reviewed and selected from 33 submissions. The book focuses on research and development involving innovative methods, software and hardware, whereby intelligent systems are applied to industrial production and logistics. This is currently related to the concept of industry 4.0 - an expression reflecting the trend towards automation and data exchange in manufacturing technologies and processes which include cyber-physical systems, the industrial internet of things, industrial robotics, cloud computing, cognitive computing and artificial intelligence.

Innovative Intelligent Industrial Production and Logistics

Treating bodies as more than discursive in social research can feel out of place in academia. As a result, embodiment studies remain on the outside of academic knowledge construction and critical scholarship. However, embodiment scholars suggest that investigations into the profound division created by privileging the mind-intellect over the body-spirit are integral to the project of decolonization. The field of embodiment theorizes bodies as knowledgeable in ways that include but are not solely cognitive. The contributors to this collection suggest developing embodied ways of teaching, learning, and knowing through embodied experiences such as yoga, mindfulness, illness, and trauma. Although the contributors challenge Western educational frameworks from within and beyond academic settings, they also acknowledge and draw attention to the incommensurability between decolonization and aspects of social justice projects in education. By addressing this tension ethically and deliberately, the contributors engage thoughtfully with decolonization and make a substantial, and sometimes unsettling, contribution to critical studies in education.

Sharing Breath

Christian Liberal Arts articulates the practical, pedagogical, and theological reasons why Christian liberal arts colleges are distinctive in the world of American higher education. Mannoia enumerates the intrinsic and instrumental values of Christian liberal arts, and how both should forcefully shape an institution's goals.

Christian Liberal Arts

A collection of essays on interdisciplinary theory, research, and teaching.

Valences of Interdisciplinarity

This volume includes the full proceedings from the 2012 World Marketing Congress and Cultural Perspectives in Marketing held in Atlanta, Georgia with the theme Thriving in a New World Economy. The focus of the conference and the enclosed papers is on global marketing thought, issues and practices. This volume presents papers on various topics including marketing management, marketing strategy, and consumer behavior. Founded in 1971, the Academy of Marketing Science is an international organization dedicated to promoting timely explorations of phenomena related to the science of marketing in theory, research, and practice. Among its services to members and the community at large, the Academy offers conferences, congresses and symposia that attract delegates from around the world. Presentations from these events are published in this Proceedings series, which offers a comprehensive archive of volumes reflecting the evolution of the field. Volumes deliver cutting-edge research and insights, complimenting the Academy's flagship journals, the Journal of the Academy of Marketing Science (JAMS) and AMS Review. Volumes are edited by leading scholars and practitioners across a wide range of subject areas in marketing science.

Thriving in a New World Economy

How can ethnographic studies be generalized, in contrast to concentrating on the individual case? Noblit and Hare propose a new method for synthesizing from qualitative studies: meta-ethnography. After citing the criteria to be used in comparing qualitative research projects, the authors define the ways these can then be aggregated to create more cogent syntheses of research. Using examples from numerous studies ranging from ethnographic work in educational settings to the Mead-Freeman controversy over Samoan youth, Meta-Ethnography offers useful procedural advice from both comparative and cumulative analyses of qualitative data. This provocative volume will be read with interest by researchers and students in qualitative research methods, ethnography, education, sociology, and anthropology. "After defining metaphor and synthesis, these authors provide a step-by-step program that will allow the researcher to show similarity (reciprocal translation), difference (refutation), or similarity at a higher level (lines or argument synthesis) among sample studies....Contain(s) valuable strategies at a seldom-used level of analysis." --Contemporary Sociology "The authors made an important contribution by reframing how we think of ethnography comparison in a way that is compatible with the new developments in interpretive ethnography. Meta-Ethnography is well worth consulting for the problem definition it offers." --The Journal of Nervous and Mental Disease "This book had to be written and I am pleased it was. Someone needed to break the ice and offer a strategy for summarizing multiple ethnographic studies. Noblit and Hare have done a commendable job of giving the research community one approach for doing so. Further, no one else can now venture into this area of synthesizing qualitative studies without making references to and positioning themselves vis-a-vis this volume." -Educational Studies

Meta-Ethnography

This book constitutes the refereed proceedings of the IFIP TC 8 International Conference on E-Government and E-Services, EGES 2010 and the IFIP TC 8 International Conference on Global Information Systems Processes, GISP 2010, held as part of the 21st World Computer Congress, WCC 2010, in Brisbane,

Australia, in September 2010. The 12 revised full papers presented at EGES were carefully reviewed and selected from numerous submissions. The papers are organized in topical sections on interoperability, participation, adoption and diffusion, back-end transformation, and new applications. The 6 revised full papers presented at GISP were carefully reviewed and selected from 13 submissions. They are organized in two parts: global case studies on process design issues with four papers covering the contextual settings of Singapore, Kuwait, Finland and South Africa, and globalized process design with two papers dealing with the demands of large scale process models and a process design project covering two continents.

Research Paper

This book constitutes the documentation of the scientific outcome of the priority program Integration of Software Specification Techniques for Applications in Engineering sponsored by the German Research Foundation (DFG). It includes main contributions of the projects of the priority program and of additional international experts in the field. Some of the papers included were presented at the related Third International Workshop on the topic, INT 2004, held in Barcelona, Spain in March 2004. The 25 revised full papers presented together with 6 section introductions by the volume editors were carefully reviewed and selected for inclusion in the book. The papers are organized in topical sections on reference case study production automation, reference case study traffic control systems, petri nets and related approaches in engineering, charts, verification, and integration modeling.

E-Government, E-Services and Global Processes

SMC COLOMBIER FONTAINE is a company in the AFE METAL group, which uses a sand casting process to manufacture steel primary parts. To reduce the \"time to market\"

Integration of Software Specification Techniques for Applications in Engineering

A pioneer in the theory of pluralistic casuistry, the idea that there are almost as many facets to moral choices as there are cases that call for choices, Baruch Brody takes issue with conventional bioethical wisdom and challenges the rigid principlism of contemporary bioethics. His views have been seen as controversial, but they are firmly held, and convincingly argued--all of which have led him to be one of the most widely discussed and highly admired bioethicists of our time. He argues for the fundamental distinction between active and passive euthanasia, for a need to reconceptualize approaches to brain death, and for the right of providers to unilaterally discontinue life support. He shows support for the waiving of the requirement of informed consent for some research, for the widespread use of animals in research, and for the use of placebos in many international clinical trials. When it comes to morality as it is practiced in medicine, Brody makes clear that the ethical issues are never as simple as black and white--that there are myriad factors and fine nuances that can and should challenge decision making as it is commonly practiced in difficult medical cases. In this collection, delving thoughtfully and systematically into methodology, research ethics, clinical ethics, and Jewish medical ethics, he tackles thorny life-and-death questions head-on and fearlessly. He casts a light into all the corners of end-of-life decisions--a field in which he has exemplary credentials--while illuminating a new understanding of morality and ethics. The introduction outlines Brody's approach, defines the terminology used, and contrasts his ethical positions with much of the competing literature. Taking Issue will be invaluable to students and scholars in medical ethics, bioethics, and philosophy of medicine.

Methods and Tools for Co-operative and Integrated Design

This book constitutes the thoroughly refereed postproceedings of the International Workshop on Trends in Enterprise Application Architecture, TEAA 2005, held in Trondheim, Norway in August 2005 as satellite event of the 31st International Conference on Very Large Data Bases, VLDB 2005. The 10 revised full papers presented together with the abstract of the keynote lecture were carefully reviewed and selected from numerous submissions for inclusion in the book.

Taking Issue

It is crucial today to understand how religions can exist harmoniously in a shared environment, whether local or global. A reasoned approach to this question was sought by participants at a stimulating conference of the International Association for the History of Religions (IAHR) in a predominantly Muslim country, Indonesia. Themes treated include the relation between theoretical approaches and religious viewpoints, practical problems and conflict resolution at the local level, and religious education with special reference to the role of Muslim schools (pesantren) in Indonesia.

Trends in Enterprise Application Architecture

Increasing user awareness in various information and communication technology (ICT) activities is one of the most challenging tasks for organizations. One popular way to engage users in various domains is gamification, which is the use of game elements and digital game design techniques in non-game applications. By using game elements, applications become more attractive and provide benefits such as increased user activity and sociability, quality, and productivity of actions. Gamification is introduced in various stages of the software development lifecycle starting with the first phase of eliciting requirements to the final phases of testing and evaluation of the system to be. In parallel, the introduction of game elements in non-games raises a number of security and privacy issues. This book presents innovative research efforts and technical solutions related to gamification and improving user engagement in all stages of the development process.

Religious Harmony

In the 1980s, following the recommendation of a presidential commission, all fifty states replaced previous cardiopulmonary definitions of death with one that also included total and irreversible cessation of brain function. *The Definition of Death: Contemporary Controversies* is the first comprehensive review of the clinical, philosophical, and public policy implications of our effort to redefine the change in status from living person to corpse. Edited by Stuart J. Youngner, Robert M. Arnold, and Renie Schapiro, the book is the result of a collaboration among internationally recognized scholars from the fields of medicine, philosophy, social science, law, and religious studies. Throughout, the contributors struggle to reconcile inconsistencies and gaps in our traditional understanding of death and to respond to the public's concern that, in the determination of death under current policies, patients' interests may be compromised by the demand for organ retrieval. Their questions about the philosophical and scientific bases for determining death lead, inevitably, to more profound questions of social policy. Acknowledging that the definition of death is as much a social construct as a scientific one, the authors, in their analysis of these issues, provide a comprehensive and provocative source of information for students and scholars alike.

The Role of Gamification in Software Development Lifecycle

The Women's Liberation Movement: Europe and North America is a collection of articles that tackle various issues concerning the Women's Liberation Movement in Europe and North America. Consists of nine chapters, the book covers the feminist movement in a specific geographical region, specifically the Netherlands, France, Germany, Italy, Spain, Portugal, and North America. The book will be of great interest to readers concerned with the condition of feminist movement in Western countries.

The Definition of Death

Renewable raw materials are becoming increasingly important as an alternative resource base in industrial networks. Consequently, research for methods improving the efficient use of renewable resources in production processes with by-products is crucial. The aim is cascade utilization, thus the multiple utilization

of a raw material before its conversion into energy. The International Conference on Resource Efficiency in Interorganizational Networks (ResEff) brings together interdisciplinary researchers developing strategies and solution concepts for efficient resource utilization. It is therefore a platform for scientific exchange both between experts as well as interdisciplinary groups from agricultural and forestry science, mathematical optimization, operations research, marketing, business informatics, production and logistics. The following facets of the challenging topic of resource efficiency in interorganizational networks are covered: Materials, technologies, planning of production and value-added networks for renewable resources as well as governance, coordination and sale of products from renewable resources.

The Women's Liberation Movement

Research paper from the year 2013 in the subject Psychology - Social Psychology, grade: 1.3, Leuphana Universität Lüneburg, course: Communication and Leadership – Asian and Western Perspectives, language: English, abstract: The paper "The Leadership Style of Yoshihiko Noda and Vladimir Putin – An Intercultural Comparison" discusses the impact of different leadership styles in Russia and Japan from a western and asian perspective. It outlines the major theories of leadership studies as well as certain aspects of intercultural findings. In the comparison of the two leaders, their background and culture are certain hints that on the one hand culture has an undisputable impact on a leader's behaviour however on the other hand a leader is able to surpass cultural boundaries.

ECMLG 2022 18th European Conference on Management, Leadership and Governance

This volume - the second in this series concerned with motivation and foreign language learning - includes papers presented at a colloquium on second language motivation at the American Association for Applied Linguistics as well as a number of specially commissioned surveys.

First International Conference on Resource Efficiency in Interorganizational Networks - ResEff 2013 -

Meet all the challenges of professional practice—whatever your specialty or environment. Noted nursing professionals and educators explore all of the non-clinical roles and responsibilities of an APN and chart a course that will enable you to meet them successfully. You'll follow the evolution of the APN's role from a historical perspective to the present and examine the issues and challenges you'll encounter in the future.

The Leadership Style of Yoshihiko Noda and Vladimir Putin

Unlike other books that focus on the nuts-and-bolts of the negotiation process, this text's conceptual approach draws on psychology, economics, and law to provide students with an in-depth understanding of the cognitive and interpersonal underpinnings of negotiation. A total of 21 original negotiation simulations and exercises, with private information for each party, are provided to adopters outside of the text, enable students to apply the lessons of each chapter in context-rich environments in a variety of transactional and litigation settings. New to the 4th Edition: Significant revisions to Chapter 10 ("Gender and Culture"), incorporating the significant amount of scholarship on gender differences in negotiation that has been published in the last decade. Significant revisions to Chapter 14 ("Deceit"), reflecting the burgeoning literature in the field of behavioral ethics. Minor updates and revisions to other chapters. Minor updates to existing simulations and additional new simulations. Professors and students will benefit from: Rigorous, social science-based approach to understanding negotiation as a fundamental process of human interaction. Modular organization, so instructors can choose to assign the chapters in a different order than presented, to better suit their conception of the course without creating undue confusion on the part of students. Each chapter of the book exposes students to challenging theoretical concepts through a combination of narrative

material, excerpts of published books and articles, and note material that further explains and builds on points made in the narrative and excerpted sections. The “Discussion Questions and Problems” that end each chapter provide an opportunity for students to explore and apply the reading material in a class discussion format.

Motivation and Second Language Acquisition

Bringing together seasoned professionals from many disciplines of medicine, this timely resource helps readers develop communication skills and prepares them to work inter-professionally with those who have different perspectives and thought processes.

Advanced Practice Nursing

The essays in this volume examine the emergence of the concept of corporate social responsibility, and the uses that have been made of the language of corporate responsibility to explore the business/society relationship. The first section traces the emergence of the concept of corporate social responsibility as a way of understanding and framing the business/society relationship. Section two of the volume looks at “Definitions and ethical justifications” with a view to exploring current discussions of the nature, scope and source of the social responsibilities of corporations. Section three, “CSR and Management: Critical Reflections”

Negotiation Theory and Strategy

As part of The International Library of Management series, this two-volume set investigates ethics in business and economics.
